

## ImmunID to Present at Two Upcoming Conferences

### **European Cancer Cluster Partnering - Centre des Congrès Pierre Baudis**

*Toulouse, France | September 14-16, 2011*

### **French Biotech Tour - MIT Faculty Club**

*Cambridge, MA, USA | September 21, 2011*

**Grenoble, Lyon (France) – September 6, 2011** – ImmunID, the immune repertoire diversity company, has been invited to present at two upcoming conferences, in France and in the United States.

On Thursday September 15, 2011 at ECCP in Toulouse, Dr Christophe Caux, Senior Scientist at INSERM and at the Leon Bérard Center (Lyon) and Nadia Plantier, Director of External Collaborations and Business Development at ImmunID, will give a joint presentation on the current collaboration between the Leon Bérard Center and ImmunID. The talk will focus on the investigation of ImmunID's innovative biomarker, divpenia®, as a prognostic factor in metastatic Breast Cancer.

On Wednesday September 21, 2011 at the French Biotech Tour in Cambridge, MA, Isabelle Tanneau, Scientific Sales Manager at ImmunID, will provide an introduction to the company's biomarker, divpenia®, and on ImmunID's latest achievements in stratifying and monitoring patients suffering from Infectious Diseases and Cancer.

### **About ECCP**

European Cancer Cluster Partnering (ECCP) is the oncology partnering meeting in Europe for biotech, pharma, investors, clinicians and academia. The event is organized by Toulouse Cancer Bio-Santé biocluster and the Oslo Cancer Cluster. This third ECCP will take place in Toulouse, France on September 14-16, 2011.

For more information on ECCP, please visit: <http://www.ecc-partnering.com/>

### **About the French Biotech Tour**

The French Biotech Tour is a US-French partnering event with a focus on infectious diseases and vaccines. The event consists of company presentations, pre-booked, validated one-to-one meetings and informal networking opportunities. The FBT is organized by Ubifrance, the French agency for international business development. This fourth FBT will be held in Cambridge, MA on September 21, 2011.

### **About ImmunID Technologies**

Based in Grenoble and Lyon, France, ImmunID is a molecular diagnostics company that uses the immune repertoire diversity as a universal biomarker of health status and treatment efficiency. Indeed, patients with different levels of immune competence will have very different clinical outcomes. Based on this rationale, ImmunID's team is dedicated to bringing solutions for the assessment of the efficacy and safety of molecules during clinical trials and

for patient stratification, in the areas of Oncology and Infectious Diseases. The company recently introduced the innovative concept of divpenia<sup>®</sup>, a clinical state of reduced T & B lymphocytes immune diversity that correlates with a higher risk of infection & mortality and a reduced treatment efficiency. Divpenia<sup>®</sup> is detected by measuring the diversity of T and B lymphocyte receptors (TCR or BCR) using the ImmunTraCkeR<sup>®</sup> or Immun'Ig<sup>®</sup> tests. These tests allow the identification and characterization of V(D)J rearrangements on genomic DNA. ImmunID has gained a strong expertise in Solid Tumors and Hematological Malignancies during the clinical validation of divpenia<sup>®</sup>. The company is also providing immunomonitoring & stratification services to several biotech companies, pharmas and clinical research centers in additional indications, including HIV, HCV, and HSCT.

For further information on ImmunID and Divpenia<sup>®</sup>, please visit the following websites:
